FRONTEND DEVELOPER ANGULAR

I am Rina Plata, a Frontend Developer specializing in Angular, TypeScript, and web accessibility. I focus on creating inclusive, user-centered interfaces and enhancing accessibility through audits with WAVE, Lighthouse, IBM Equal Access, and manual testing. I also build automated tests with Playwright, write Angular unit tests using Jasmine and Jest, and develop .NET unit tests with xUnit. I collaborate in Scrum teams, work with SQL, and use GitHub, ClickUp, Asana, Windsurf, OpenAI, and GitHub Copilot.

WORK EXPERIENCE

Freelance

Medellín, Colombia (Remote)

Freelance developer

Oct 2025 - Present

- Currently working with .NET and Blazor at a medical insurance company, contributing to the development of secure, scalable, and high-quality web applications.
- Using Radzen in Blazor to build dynamic, efficient UI components and enhance the overall user experience across modules.
- Collaborating on Angular projects with a strong focus on accessibility (a11y), implementing best practices to create inclusive, user-friendly interfaces for all users.

Syspotec

Medellín, Colombia (Remote)

Software Developer

Nov 2023 - Oct 2025

- Responsible for the development of web applications using Angular, contributing to the creation of innovative, accessible, and efficient solutions across multiple projects. I design and implement modern, user-centred interfaces, and have worked extensively on frontend development, API consumption, and component creation using PrimeNG and Tailwind.
- I have collaborated in several full-cycle development projects, working with ClickUp, Scrum, and Kanban methodologies. My responsibilities included creating UI designs in Figma, documenting technical processes, and performing digital accessibility testing following WCAG 2.1 guidelines, using various tools to ensure inclusive, high-quality experiences.
- Additionally, I performed SQL tasks such as table creation, supported legacy and CMS Evoq (DNN) applications, and handled client-reported issues across different systems. I also contributed to Angular migrations from version 12 to 18, participated in requirement gathering, and provided support and development for regulatory flows such as CREG 075 and CREG 174 for public service companies in Colombia.

BCPartners Tech

Medellín, Colombia (Remote)

Frontend- Developer(Freelance)

Feb 2022 - Mar 2025

- Identified and documented project errors, organizing findings and improvements while working in a legacy environment using Asana for task management.
- Created detailed sequence diagrams for key endpoints and worked on the Stripe integration, identifying user events and payments to support accurate transaction tracking.
- Interface errors reported by customers were resolved by analyzing and mapping the affected areas of the frontend in AngularJS to ensure clear and consistent navigation within a product developed under the Scrum methodology.

Net University

Medellín, Colombia (Remote)

Author Relationships Lead

Jul 2021 - Jun 2022

- Responsible for moderating social networks, managing authors and follow-ups for online courses, being present in the streamings and recruiting new teachers.
- Recruited and onboarded more than 50 new educators through targeted outreach initiatives, expanding the teaching team by 35% and diversifying course offerings to attract a broader student base.

SKILLS & INTERESTS

Skills: React basics, Angular, TypeScript, JavaScript, HTML, CSS, PrimeNG and Tailwind

Accessibility: WCAG 2.1 , WAVE , Lighthouse, IBM Equal Access , TestCraft, ARIA and Manual testing

Testing: Playwright (E2E), Jasmine, Jest and xUnit (.NET)

Backend: .NET basics · REST APIs

Database: SQL fundamentals and SQL server

Tools: GitHub, ClickUp, Asana, Azure Devops, Windsurf, OpenAI, GitHub Copilot, Figma and CMS Evoq (DNN)

Scrum: Scrum, Kanban and Agile collaboration

Interests: Accessibility, Inclusive design, UI/UX, Performance optimization and communities

EDUCATION

Tecnologico de Antioquia	Medellín, Colombia
<i>Software engineer</i>	<i>Graduation Date: Mar 2025</i>

PROJECT EXPERIENCE

Rediseño Web + Accesibilidad	Medellín, Colombia
<i>Frontend developer</i>	<i>Start Date - Apr 2025</i>
Improved semantic structure, fixed WCAG issues, and enhanced document navigation and readability.
